WORK EXPERIENCE

RSP Blue

Jun. 2024 – Present

Software Engineer

Remote

- Engineered and delivered full-stack software solutions, including web and mobile interface prototypes, for a diverse portfolio of high-profile clients as below. See rspblue.com.
- iG Corp: Led the development of responsive landing pages, new features for the iG Mail Premium product, and the UI for the 'My Account' portal. Engineered a unified platform to centralize all iG products and payment processing. Spearheaded email marketing campaigns that successfully recovered 33.1% of lapsed subscribers.
- Copastur: Developed key frontend features, new modules, and delivered significant performance upgrades using React.js. Built a spreadsheet import tool for the event management system, automating calculations to save client time and costs. Took ownership of resolving critical bugs in high-value features.
- Mundial Logistics: Built the primary media carousel for the supply chain portal, implementing features like image zoom, minimaps, and fullscreen mode to improve supplier interaction.
- KWI: Architected an AI-powered n8n automation to generate comprehensive import dossiers for health products. The system analyzes taxes and regulations to provide a 'Go/No-Go' evaluation and delivers reports in Portuguese, English, and Korean.
- Tech Stacks used: JQuery, JavaScript/TypeScript, HTML, CSS, Wordpress, React.js, Next.js, C#, .NET, Entity Framework, SQL, AI, GTM, Email Marketing, Git/GitHub, Figma, Vite.js, TailwindCss, Node.js, REST APIs, Azure, Micro Services, ASP.NET Core, CSS/Sass, n8n, Gemini AI, React Native, Redux

Kenzie Academy

Nov. 2023 – May 2024

Full Stack Monitor

Remote

- Provided assistance to students in backend and frontend modules.
- Debugged and reviewed student's projects
- I also helped interns grasp the basics of design enabling them to make meaningful contributions.
- Tech Stack: React.js, Next.js, JavaScript/TypeScript, HTML, CSS, REST APIs, Python, Django, Nest.js, PostgreSQL, Figma.

EDUCATION

International University Center - UNINTER

Feb, 2026

Bachelor of Science, Systems Analysis and Development

Juiz de Fora, MG

- Developed and maintained a personal Full-Stack Portfolio using Next.js, TypeScript, and Node.js to showcase key projects and technical proficiency in modern web development.
- Conceptualized and launched "Filantropia Web," an extension project designed to provide pro bono web services (design, development, maintenance) to local NGOs and charitable organizations.

CERTIFICATIONS, SKILLS & INTERESTS

- **Certifications:** Fullstack development course at Kenzie Academy - 2000h;
- **Skills:** JavaScript, TypeScript, React.js, Next.js, C#, .NET, Node.js, Python, React Native, SQL, HTML, CSS/Sass, jQuery, Redux, TailwindCss, Vite.js, Azure, Entity Framework, REST APIs, Micro Services, Figma, Gemini AI, n8n, PostgreSQL, Git/GitHub, Leadership, Problem Solving, Full-Stack, Frontend, Backend, Mobile, Mentorship, Performance Optimization, Project Management.
- **Interests:** gaming; jogging; financial market; *pets*; martial arts;
